

Applications

The only system capable of satisfying the needs of building compounds with up to 4096 users and 600 metres of total wiring with ONLY two wires in each segment.

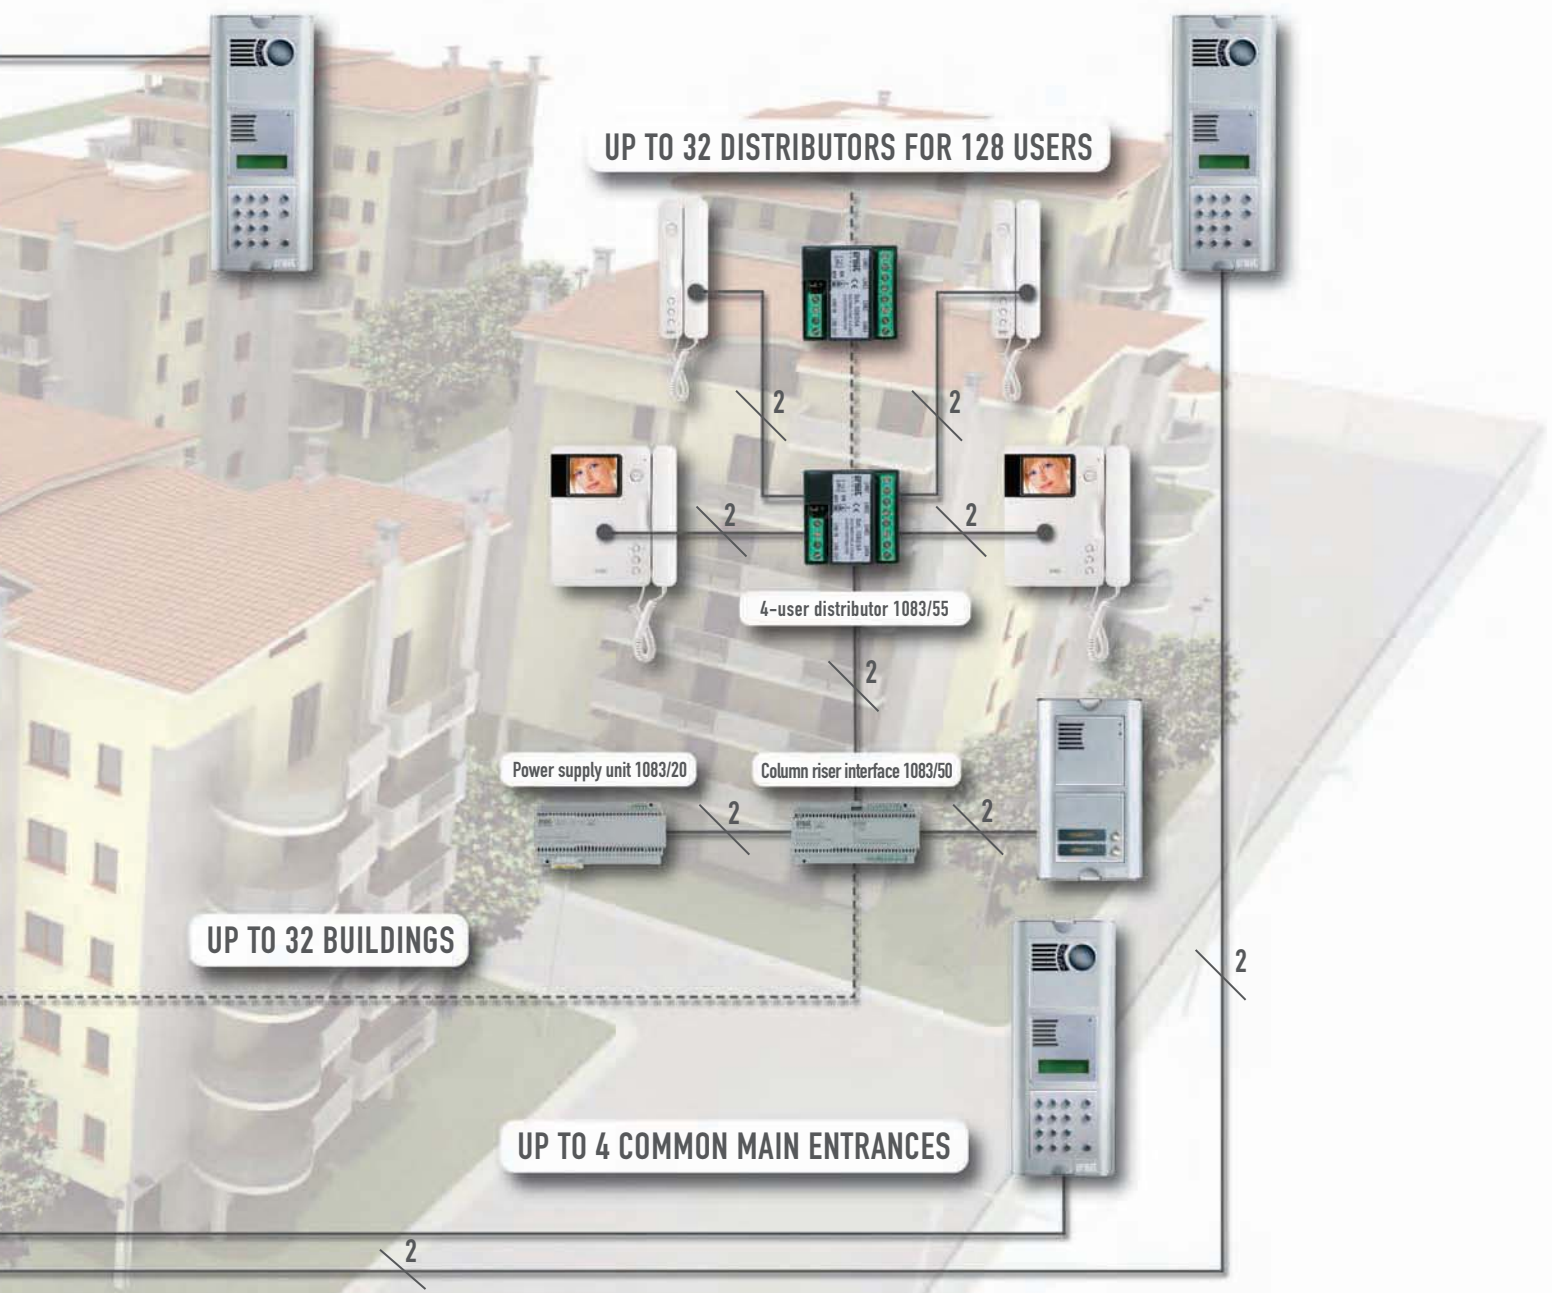

ADVANTAGES

- Up to 600 metres of distance between entry panel and monitor
- Up to 32 buildings and 4096 total users
- Possibility of installing concierge switchboard
- Standard garage door management

Residential compounds

Up to four common entrances and two secondary entrances switching per building. Possibility of installing a concierge switchboard and implementing video surveillance and supplementary functions.

A system for a new block of flats can be made using the dedicated 2Voice wire 1083/90 or 1083/92. Existing wires can be used when modernising an existing system. Refer to the wire table on page 37 for limitations concerning number of users, distances and extensions.
